10 Reasons (Some) SME'S Underperform

- 1. Passion
- 2. Physical and mental strength
- 3. Self-doubt
- 4. Belief
- 5. Foresight
- 6. Guts
- 7. Failure
- 8. Self-discipline
- 9. Fairness
- 10. Integrity

"The Perfect Storm"

Reduced Angel Activity

- Angel Investors reduced their investments in 2009 Q1/Q2 by over 27%
- Availability of investment capital among angels decreased dramatically by 50% in 2009

Venture Funding Moving Downstream

- The average investment by venture firms last year was \$8.3 million per investment and only about 4% of the capital went to early-stage companies.
- First Quarter of 2010 was the worst quarter in 12 ½ in terms of total capital invested by venture firms

State TBED Budgets Decreasing

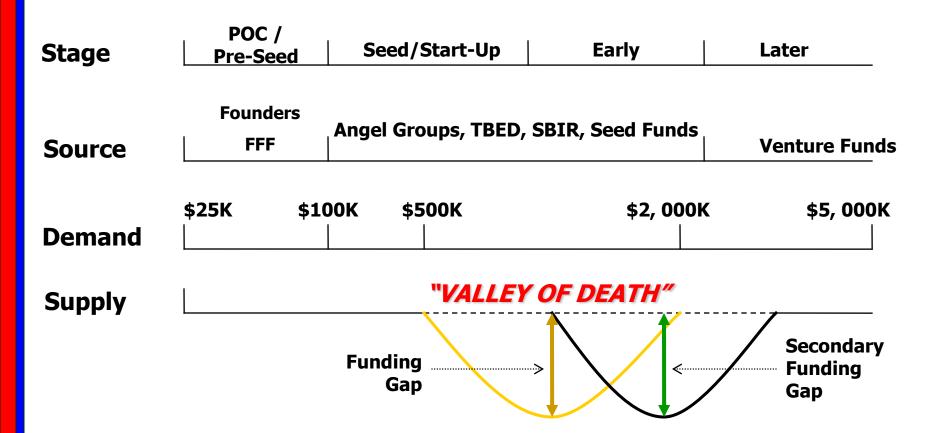

44 states have budget deficits

Jobs! Jobs! Jobs!

Does Seed Investing REALLY Create Jobs?

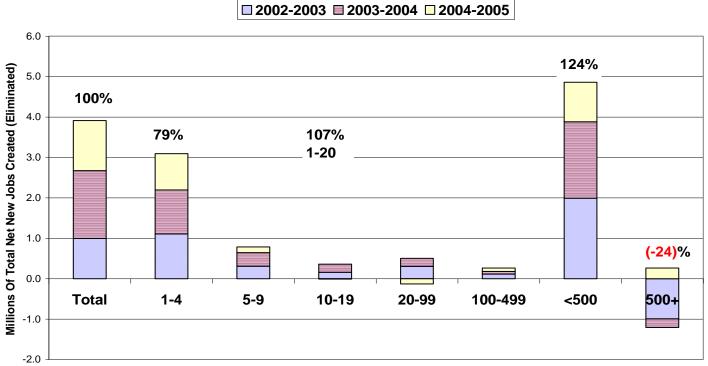

2001 Recession: Small Business Drives Job Creation

• In the three years after the 2001 recession, Companies of less than 20 employees created 107% of net new jobs while companies over 500 employees eliminated a net of -24%

Total USA Cumulative Net New Job Creation 2002 to 2005 (In The Three Years After The 2001-2002 Recession)

Best Practices in IBED

Ohio Third Frontier

nnovation Creating Opportunity

The Ohio Third Frontier represents an unprecedented and bipartisan commitment to expand Ohio's technological strengths and promote commercialization that leads to economic prosperity throughout Ohio. Designed to build world-class research programs, nurture early-stage companies, and foster technology development that makes existing industries more productive, Ohio Third Frontier creates opportunity through innovation.

"Ohio's \$700M Third Frontier initiative is a comprehensive, professionally run effort to build world-class research capacity, promote interaction between research and industry, and commercialize R&D." -

Chuming the Greater Philadelphia Innovation Economy

A Roadmap for Regional Growth

You can always amend a big plan, but you can never expand a little one.
I don't believe in little plans.
I believe in plans big enough to meet a situation which we can't possibly forsee now.

- Harry S. Truman

Leveraging the Talent Pipeline

What Worked For KTEC and Innovation Philadelphia

- FOCUSED & INTEGRATED Science & Technology Collaboration
- PRIVATE Sector Leadership and COMMITMENT
- Organization's function as a BUSINESS
- Successfully manage a technology investment portfolio for ROI
- Operational FLEXIBILITY
- ACCOUNTABILITY with measurable outcomes
- Experienced PROFESSIONAL team
- Focus on the ENTREPRENEUR'S needs
- SUSTAINABLE Funding

Regional Innovation Clusters Initiative (RICs)

RICs are a geographically-bounded, active network of similar, synergistic or complementary organizations which leverage their region's unique competitive strengths to create jobs and broader prosperity.

Energy Regional Innovation Cluster (E-RIC)

- •\$129.7 million over five years to create an Energy Innovation Hub
- •Focused on developing new technologies to improve the design of energy-efficient building systems.
- •Regional research centers will develop new building efficiency technologies and work with local partners to implement the technologies in area buildings.

Why do RICs Matter?

- They create a transition path from unemployment or underemployment to high-skill jobs.
- On average, jobs within clusters pay higher wages.
- Regional industries based on inherent place-based advantages are less susceptible to off-shoring.
- Create many new job opportunities for American workers.
- They connect disenfranchised communities to new career and educational opportunities.
- They stabilize communities by re-purposing idle manufacturing assets, engaging underutilized human capital, and contributing to improvements in the quality of life.

Regional Innovation Clusters

- Implies bounded area characterized by inherent social, environmental, economic, and cultural assets
- Transcends socio-political boundaries
- May include urban & rural

Regional Innovation Clusters

Five Key Components to Consider When Defining Unique Regional Assets

What you make, including your existing & prospective industry clusters

What you do: your workforce skills & human capital base

TALENT

INNOVATION
& IDEAS

Location, Infrastructure, Amenities,
Factor Costs, Natural Resources

Your capacity to create companies wholly new or from existing firms

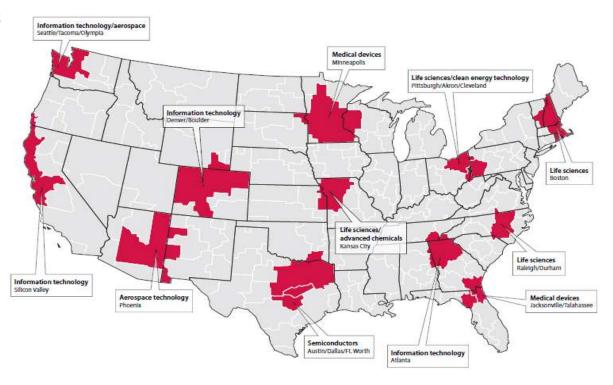

Your capacity to innovate and generate new ideas

The basic conditions defining the economic milieu of the region

RICs Are Diverse

- All parts of the nation
- Can be in wide array of industries
- Vary in size, shape, and reach
- Often cross local, county, and state boundaries
- Urban and rural

A SNAPSHOT OF U.S. INNOVATION CLUSTERS A selection of high-tech clusters in different parts of our country

Source-Cluster Mapping Project, Institute for Strategy and Competitiveness, Harvard Business School, Copyright @ 2005 President and Fellows of Harvard College. All rights reserved.

Best Practices in RIC Management

- **Regionally-Led** from existing networks & assets bottom-up approach
- Involve partnerships between private and public at all levels (i.e. local, regional, state, and Federal)
- Unique **strengths of region are built upon** rather than trying to copy other regions (i.e. everyone can't support a biotech cluster)
- Different strategies are developed for different clusters
- Well-funded initially and self-sustaining over the long-term
- Linked with relevant external efforts, including regional economic development partnerships and cluster initiatives in other locations

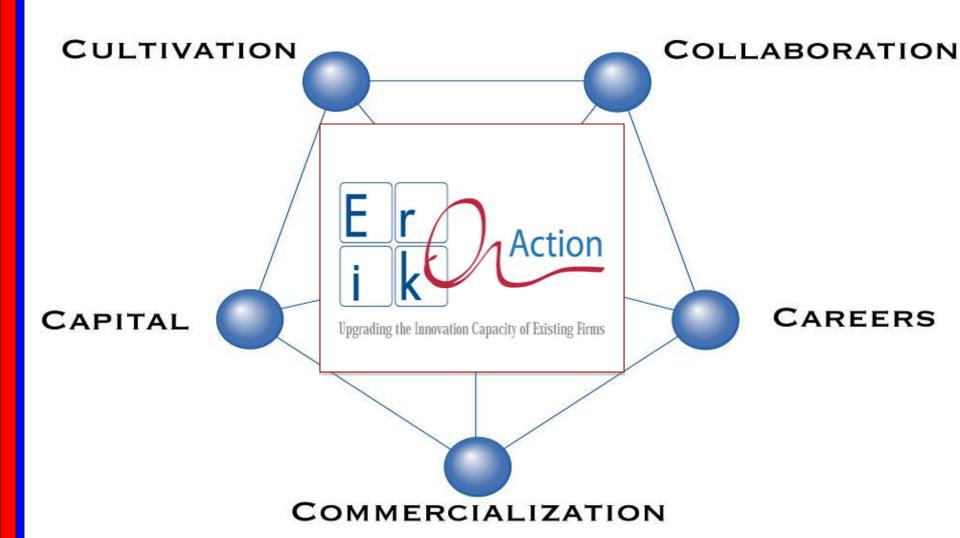

Key Innovation Road Map Elements

- 1. Asset Mapping
- 2. Cluster analysis
- 3. Innovation Benchmarking (Peer 2 Peer)
- 4. Innovation and Entrepreneurship resource identification
- 5. Innovation Economic Development organizational analysis and matrix
- 6. Gap Analysis (programs & services)
- 7. Public policy recommendations
- 8. Recommended organizational structure, governance, budget, and funding sources (Private Public Partnership)
- 9. Organizational leadership and staffing
- 10. Program portfolio/implementation
- 11. Marketing, Branding and Success Stories
- 12. Economic Impact Analysis

The Daily pulse of Global Innovation!

Innovation vs. "Awesomeness"

This "Awesomeness Manifesto" by Umair Haque hinges on a rather narrow definition for "innovation" so as to draw a contrast, but lets undermine the whole thing by highlighting the most glaring weakness."

Obsolescence is what's obsolete" means what? For nothing to ever be made obsolete, nothing new and better may be created. Haque appears to dislike the concept of creative destruction becomes some peoples' wealth is destroyed in the process of making new people wealthy... but what's the alternative? Those who are presently rich and powerful must be allowed to stay that way? Societal calcification. Stagnation. Creative destruction isn't perfect, but generally, over time, what is destroyed is less valuable than what is created. That's not a waste of our seed-corn, that's how it's supposed to be used. Seeds are consumed when you plant them, but the resulting crops are worth more than the seed. Then you collect more seed and start the next round, peoples

back to top

Can an 'Innovation Economy' Save the U.S.?

We need more political leaders like John F. Kennedy. He envisioned going to the moon and inspired the innovation to make it manifest.

THE HUFFINGTON POST

I have got to be honest. I didn't have any idea of what an "innovation economy" had to do with me until yesterday. True, I don't cover business issues normally, sticking to what I know best, which is politics, with the primary focus of foreign policy. But when I was offered the opportunity to attend the Innovation Economy Conference held in Washington, D.C. yesterday, I jumped at the chance. (I tweeted the conference as well.) Because if ever there was a time we need some out of the box thinking on our economy this is it. The event, hosted by The Aspen Institute, Intel, Democracy (a journal of ideas), and The News Hour with Jim Lehrer, I went to check out, expecting to stay for a couple of hours, but ended up staying all day. I by no means caught every speech or break-out session, but what I did witness proved one thing to me. If the U.S. doesn't get moving we're going to be in even more serious trouble.
