# Fostering the Dialogue between Science and Industry

**Martina Ebner**

**Wr. Neustadt, 3. Dezember 2003**

---

## Overview

### Innovation

- Science to Industry Know-How transfer via “**Innovation Assistants**”
- “**Innovation Days**” - dialogue between Science, Industry and Government

**RIS NÖ**  
Innovative Maßnahmen

## Innovation Assistants

**Innovation**

- Innovation Assistants are young Graduate Students fully employed by SMEs
  - => new contacts & Know-How for innovative Projects
- e.g. R.Prinz KG, a chain saw equipment producer
  - the Innovation Assistant is a mechanical engineering graduate
  - he has worked on material testing during his studies
  - together with his former University Institute they are now developing detailed tests to characterise the Prinz products to get information for improvement and innovation

## **Innovation Assistants**

### Objectives

- “Long-time” Innovation Impulse to SMEs
- Permanent employment of the Innovation Assistants
- Strengthening of the competitiveness of SMEs
- Introduction of academics to SMEs
- Increase of Technology Transfer

## **Innovation Assistants**

### First Results

- 9 Innovation Assistants are “on the job”
- During the projects 2 initial Assistant have been exchanged
- The training course will get the status of an official universal course at the Danube university Krems
- In some parts of Lower Austria it is impossible for the companies to find academic staff
